Papers presented at ISMIL are concerned with the Malay/Indonesian language in any of its varieties. In addition to the standardized versions of Bahasa Melayu and Bahasa Indonesia, papers are dealing with non-canonical isolects such as regional dialects of Malay and Indonesian, contact varieties (Bazaar Malay, Cocos Malay, Manado Malay, Southwest Moluccan Malay, Sri Lankan Malay), and other closely related Malayic languages (Delang, Iban, Kerinci, Mualang).

Subfields of linguistics covered are: language history, phonetics, morphology, syntax, semantics, language acquisition, and linguistic ecology. Approaches are variegated and based on diverse theoretical persuasions.
